

INSPYRE E-MAIL SERVICES

FAST, RELIABLE E-MAIL SERVICES THAT SCALE TO FIT THE NEEDS OF YOUR GROWING ORGANIZATION

E-mail communication has quickly become the primary means of communication for millions of organizations around the world. When communicating with your clients, donors, or staff members is such a critical component for your day to day operations, you need e-mail services that will enable you to share your ideas easily and ultimately accomplish your daily objectives. Inspyre offers a collection of e-mail services ranging from basic services like e-mail forwarding to shared and dedicated Microsoft Exchange. Start where you want and grow into our enterprise level services. It's completely up to you.

LEVELS OF E-MAIL SERVICES

For many people, e-mail is simply a matter of opening their e-mail software and checking their Inbox. However, few stop to think about how the messages get there and what type of technology works together to insure that messages are sent and received reliably. When you need e-mail for your organization, there are so many options that evaluating one service against another can be confusing. Below is a quick explanation of the basic types of e-mail services that exist.

E-MAIL FORWARDING

This works much like mail forwarding does when you change your house address. Mail that reaches your old address is routed to your new address. With e-mail forwarding, you can create “alias” addresses that forward e-mail to your current internet service provider’s e-mail address. For example, you can create an address called “info@yourdomain.com” and have all e-mail forward to your AOL account. It’s that simple.

E-mail Forwarding Service: Bundled into Select Hosting Services

POP E-MAIL

POP (Post Office Protocol) e-mail service works like a physical mailbox does. Mail that is sent to it is stored until the e-mail user picks it up using an e-mail client such as Microsoft Outlook, Apple’s Entourage, or a web-mail client. Your internet service provider has most likely issued you a POP e-mail account that you use on a daily basis. For example, you can create an e-mail address called “jane@yourdomain.com” and use it to receive and send e-mail.

You can also access your POP service through the IMAP protocol to centralize storage of your e-mail. With IMAP, you can access your e-mail folders and messages from any computer via your favorite e-mail client. Unlike POP,

messages are not deleted from our server, but stored there until you delete them. We provide you with 500 MB of e-mail storage space, upgradable to 1 GB for your entire domain.

*POP E-mail Service: Bundled into Select Hosting Services
500 MB Additional E-mail Storage Space for Domain: \$5/mo*

MICROSOFT EXCHANGE SERVICES

Exchange services extend well beyond your typical e-mail service. They allow for team collaboration through shared calendaring, contacts, tasks, and much more. Inspyre is pleased to offer this enterprise-level service to organizations that need to be able to closely communicate and coordinate their mission-critical efforts while enjoying unmatched reliability and performance. Exchange also centralizes all of your e-mail files so that nothing is stored on your local computer, protecting you from hard drive failures and loss of critical communication data.

Microsoft Exchange Services: \$99 Set-Up Fee, \$12 per User per Month
